

L-300 Cleaning & Deburring Compound

Is an alkaline, low foaming cleaning system for ferrous metals. It contains potent wetting and dispersing agents to penetrate and suspend heavy soils. This coupled with a highly soluble alkaline build boosts detergency and promotes optimum finishes. This product contains Sodium Nitrite as a corrosion inhibitor to keep parts bright between processes.

USAGE AND DILUTION INSTRUCTIONS

For tumbling and vibratory finishing operations use 1/2 to 1 ounce per gallon of water. Due to the fact that this is a very highly concentrated product, using higher than recommended product concentrations may decrease cleaning efficiency rather than improve it. Consult your representative for specific recommendations.

PHYSICAL PROPERTIES

Appearance	Yellow liquid
pH @ 1% Solution	11.6
Solubility in Water	Complete
Foaming Action	Controlled
Rinsing Action	Excellent
Odor	Mild
Metal Safety	Ferrous & Non-Ferrous
Flash Point	None

HANDLING AND STORAGE INSTRUCTIONS

This product present no fire hazards. This is a highly alkaline product. Avoid contact with skin, eyes, and clothing. If it is spilled on skin, flush with plenty of water and contact physician if irritation develops. If splashed in eyes flush eyes immediately for 15 minutes contacting physician immediately. Store product in tightly closed containers between 50° and 90° F. Rotate stock. When stored as stated above, shelf life is a minimum of 2 years.

Progress Chemical guarantees its products will perform to your satisfaction when used in accordance to our recommendations. We back this guarantee with over 50 years experience. Our company has been certified to ISO 9001:2000 Quality Standards.

Refer to our Material Safety Data Sheet for additional information.
